## **Economic Research**

Our Economic Research pages are designed to consolidate information from various sources into a single, easy-to-use source. Much of the information is originated and maintained by various groups or agencies but our links take you directly to the sub sets of information pertaining to each parish. SLEC also produces original economic research that is made available through this site.

If there is specific economic research that you do not find here, please contact SLEC at 985-448-4485.
